SIGN UP FOR THE
CLOUD + ENJOY
THE BENEFITS

RELIABLE COLOUR MANAGEMENT.

The Marabu **ColorManager Online** ensures quick access to recipes and consistent colour quality for every repeat job.

FOR MORE CONSISTENCY IN COLOUR MIXING AND TIME SAVING

The free Marabu ColorManager Online software allows screen and pad printers worldwide to access colour formulas for all common PANTONE®, RAL® and HKS® colours or colour numbers and mix the corresponding colour themselves.

You can also enter and save your own recipes.

A dispenser or scale can also be connected to the software. If a weighing error occurs, the software automatically compensates and adjusts the recipe accordingly.

The recipe software is so easy to use that even beginners or inexperienced operators can work accurately and without error.

Printers can use Marabu ColorManager Online as a central database to access colour recipes, save their own recipes and make them available to all employees.

NEW CLOUD MAKES IT POSSIBLE.

The new **Marabu ColorManager Online** is now available as a free cloud version. You will never miss an update again, you can work more independently and more comfortably in a team and you can access your data securely and flexibly via various end devices.

AUTOMATIC UPDATES

Software updates and colour formulation changes are instantly available to all users. There is no need for manual updates.

FASTER SEARCH FUNCTION

Advanced search filters help you find recipes faster.

Are you already using the older MCM full version or the internet version?
To upgrade to the cloud version you will need to re-register your company.

NOW FASTER AND MORE FLEXIBLE.

EASY USER MANAGEMENT

As a company, you register online once to use the MCM. The registrant can authorise additional company users as the company administrator. All company users on an account access the same recipe database.

EASY LOGIN

You choose your own password when you register.

SECURE & DEVICE INDEPENDENT

Maximum data security thanks to modern data structure. Also runs on mobile devices and is compatible with all Apple devices.

COLOUR OF SUBSTRATE

The colour of the substrate can be saved for each recipe. Users can define and save their own colours of substrates.

OPACITY

Opacity is shown for each formulation. Highly opaque basic colour shades (1XX) are also available for some ink types. Depending on your requirements, you can choose between a standard formulation and a high opacity formulation.

DISPENSER SETTING

The company administrator can configure an existing dispenser.

EXCEL EXPORT OF RECIPES

15 LANGUAGES AVAILABLE

WITH EASY IMPORT TO THE CLOUD:

- Customer formulations from previous MCM versions
 - Mixing formulations from the Marabu Colour-Formulator
- 
- 

CONSISTENT COLOUR QUALITY STEP BY STEP.

It pays to be quick:

The first 200 users to register for the cloud version will receive a handy Marabu thread counter.

PANTONE®-, RAL®- UND HKS®- FORMULATIONS

Basic colours and quantities are displayed, as well as mesh count, substrate, opacity and comments on the formulation.

CALCULATE INK CONSUMPTION

By entering the print job size, the print format, the percentage printed area and mesh count.

ENTER AND SAVE YOUR OWN RECIPES

Click on the colour buttons to add the Marabu basic colour shades.

CHANGING THE MARABU RECIPE

The customer recipe is created and processed as a duplicate. The original Marabu recipe is retained.

AUTOMATIC DOSING WITH DISPENSER

ACCURATE WEIGHING OF COMPONENTS

If too much of a component is weighed in, the remaining components of the recipe are converted.

DEFINE STANDARD QUANTITIES FOR RECIPES
